DETAILED ACTION

1. The examiner of this application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Chun Crowder, Group Art Unit 1644, Technology Center 1600.

2. Applicant's amendment, filed 03/01/2006, is acknowledged.

Claims 1-77 have been canceled.

Claims 78-86 have been added and are currently pending.

Species Election

3. Upon further consideration and applicant's amendment, additional species election is set forth herein.

4. This application contains claims directed to the following patentably distinct species of the claimed invention.

Applicant is required to elect one specific method for:

A) treating one specific immune disease (e.g. immune thrombocytopenic purpura as recited in claim 79), **AND**

B) comprising one specific antibody or antibody fragment specific to one specific marker associated with a B cell.

These species are distinct because the pathological conditions differ in etiologies and therapeutic endpoints; thus each condition represents patentably distinct subject matter. In addition, different B cell markers are distinct because their structures, physicochemical properties and mode of action are different, and they do not share a common structure that is disclosed to be essential for common utility.

Furthermore, the examination of these species would require different searches in the scientific literature. As such, it would be burdensome to search these Species together.

It is noted that claims 78-86 recite "a marker associated with a B cell". If additional structurally distinct markers are introduced during the course of prosecution that do not share *a substantial structural feature essential to a common utility* with the instantly recited "marker associated with a B cell", then a supplemental restriction requirement may be issued.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1644

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chun Crowder whose telephone number is (571) 272-8142.
